[martinluff #Q2](#) I'm pretty sure I saw a prototype of Notion Ink Adam tablet with peel-off keyboard/trackpad stuck to back - now that looked cool! [#DCTH](#) -7:57 PM Jul 29th, 2010

[mikeconaty #Q2](#) Hasn't change my opinion at all... actually have never seen one, so that's all I have to say about that. :-) [#DCTH](#) -7:57 PM Jul 29th, 2010

[dannisbet #Q2](#) To me, it's just another weird device. If it isn't a Wacom or a mouse, I'm typically not interested [#dcth](#) -7:57 PM Jul 29th, 2010

[rhdesign #Q2](#) I think its a great device 4 browsing & simplistic comp usage but I think the precision of a mouse will always b needed 4 design [#dcth](#) -7:57 PM Jul 29th, 2010

[richhemsley @DCTH #Q2](#) I'm excited about it and actually prefer it at times to a traditional mouse. It feels more natural. [#DCTH](#) -7:56 PM Jul 29th, 2010

[mikeconaty @DCTH](#) I think it has a lot to do w/ the summer, spouses/significant others/kids on break, lots of other stuff to do [#DCTH](#) -7:56 PM Jul 29th, 2010

[DCTH #Q2](#) Has the apple magic trackpad made you excited about where clicking in general could go? OR is it just another weird device? [#dcth](#) -7:55 PM Jul 29th, 2010

[martinluff @DCTH](#) - sometimes I'm here but just lurking ;) I'm guessing may be a few more folk here each week than actually say something? [#DCTH](#) -7:54 PM Jul 29th, 2010

[DCTH @martinluff](#) that's a good point. It might. [#dcth](#) -7:54 PM Jul 29th, 2010

[martinluff](#) [@azzcatdesign](#) - yes, agree, not like you make such a work/life distinction. When I think of some people's jobs - I'm so, so lucky... [#DCTH](#) -7:47 PM Jul 29th, 2010

[marc8studio](#) Hello 3dcth whats the question of the moment going? [#dcth](#) -7:43 PM Jul 29th, 2010

[azzcatdesign](#) [@martinluff](#) inline styles make me crazy...especially if I have to dig them out later. [#dcth](#) -7:42 PM Jul 29th, 2010

[azzcatdesign](#) [@viaAndrea](#) Wonder if that was the CMS or the theme? Divitis? [#dcth](#) - 7:41 PM Jul 29th, 2010

[greengoatmedia](#) yes, wine does go well with design! [#dcth](#) -7:41 PM Jul 29th, 2010

[martinluff](#) [@viaAndrea](#) - yes, that's the big issue I have with default setup of systems like Drupal - DIV-itis in the extreme... [#DCTH](#) -7:41 PM Jul 29th, 2010

[azzcatdesign](#) [@DCTH](#) [#Q1](#) No wine w/code...bad combo! :o Wine goes with Photoshop, though. :) [#dcth](#) -7:40 PM Jul 29th, 2010

[greengoatmedia](#) Set weekends aside for family and only work then if on deadline. [#dcth](#) -7:40 PM Jul 29th, 2010

[martinluff](#) [@azzcatdesign](#) yes, I think for a lot of folk inline editing seems pretty intuitive and even decent backend like WP hard to understand [#DCTH](#) -7:40 PM Jul 29th, 2010

[viaAndrea](#) [@azzcatdesign](#) Lots of unnecessary divs within divs. I haven't seen too many projects use it so maybe it was just miss used. [#dcth](#) -7:39 PM Jul 29th, 2010

[DCTH](#) [#dcth](#) [#Q1](#) what do you do to balance out the work vs. Fun ratio? Design for yourself? Drink beer & work? Cut the grass? Etc. -7:39 PM Jul 29th, 2010

[azzcatdesign](#) [@martinluff](#) Good to know. [#dcth](#) -7:38 PM Jul 29th, 2010

[martinluff](#) [@azzcatdesign](#) - overall though I didn't feel Concrete5 offered enough over the CMSs I already use... [#DCTH](#) -7:37 PM Jul 29th, 2010

[azzcatdesign](#) [@DCTH](#) I want to share those links I sent earlier with everyone. It was like a candy store this week online. :) [#dctch](#) -7:37 PM Jul 29th, 2010

[viaAndrea](#) [@azzcatdesign](#) Some of the code I've seen Concrete5 generate is pretty ugly. [#dctch](#) -7:36 PM Jul 29th, 2010

[azzcatdesign](#) [@martinluff](#) Yep...the ones who don't feel comfortable in WP admin. I could keep them from breaking it. [#dctch](#) -7:35 PM Jul 29th, 2010

[martinluff](#) [@azzcatdesign](#) - I looked at Concrete5 and seemed nice - esp. inline editing for some clients would be great... [#DCTH](#) -7:34 PM Jul 29th, 2010

[azzcatdesign](#) [@martinluff](#) It's good for me. I do custom themes. [#dctch](#) -7:34 PM Jul 29th, 2010

[martinluff](#) [@azzcatdesign](#) - WP 3.0 with Pods CMS could do a lot of stuff I think... seems WP getting more powerful as a general use tool now... [#DCTH](#) -7:33 PM Jul 29th, 2010

[azzcatdesign](#) [@greengoatmedia](#) Got two eldest leaving for SOU in Sept. (sniff) [#dctch](#) -7:33 PM Jul 29th, 2010

[martinluff](#) [@azzcatdesign](#) - have you ever tried ExpressionEngine? You can do most types of site in that with simple CSS/HTML-like tags... [#DCTH](#) -7:30 PM Jul 29th, 2010

[greengoatmedia](#) [@azzcatdesign](#) But aren't you soon to be an empty-nester Cat? [#dcth](#) -7:30 PM Jul 29th, 2010

[martinluff](#) [@greengoatmedia](#) with MODx you can do more with the templating language and from the backend CMS than SilverStripe and community great [#DCTH](#) -7:27 PM Jul 29th, 2010

[azzcatdesign](#) [@ngassmann](#) Is her big brother pleased? [#dcth](#) -7:26 PM Jul 29th, 2010

[greengoatmedia](#) [@martinluff](#) like revolution, but still can't get the TinyMCE to work! [#dcth](#) -7:25 PM Jul 29th, 2010
